SAMEER MOTWANI

Creative Director · Multimedia Designer · Brand & Campaign Systems
Beppu, Oita, Japan · sameermotwani17@gmail.com · instagram.com/retro.studios_
Portfolio: xsofficialbrand.com · linkedin.com/in/sameer-motwani-2625a62b5

PROFILE

- Creative director who takes a brand the whole way: identity and art direction, campaign photography and motion, the copy, and the site it sells on. Ran a paid 12-country World Cup apparel campaign solo as director, prompt engineer and technical producer, from first brief through to delivered assets and a working storefront.

CREATIVE EXPERIENCE

Retro Studios (under StarLabs) **Beppu, Japan**
Founder & Creative Director *Apr 2026 - Present*

- One-person AI-native creative studio producing agency-grade cinematic brand content: statics, reels, and commercial spots delivered without a crew.
- Built an 8-layer, reference-locked prompt architecture reused across every edition, including a dedicated anti-perfection layer that defeats the tells of synthetic imagery (sourceless light, static fabric, flawless skin).
- Locked a house visual DNA - ARRI Alexa / Kodak 2383 colour science - and held it across 150+ delivered hero images so a 12-market campaign reads as one film.

DK2R Football Wear **Client engagement**
Creative Director, Prompt Engineer & Technical Producer - for founder Hassan Kai Turay *Apr - Jul 2026*

- Art-directed 12 country editions for a 2026 World Cup capsule - Morocco Zellige tilework, Japan kintsugi-slashed sakura, Brazil rhinestone crest - each with its own visual language across three silhouettes, 300 numbered pieces per edition, no restocks.
- Directed AI campaign photography and video per edition, then bridged renders into factory production sheets: a 55-asset, 14-edition manufacturing QA pass shipped with zero redos.
- Designed and solo-built the live e-commerce store the collection sells on (Next.js, Supabase, Stripe, PayPal). Contract and deposit before any engagement.

SELECTED WORK - RETRO STUDIOS DISCOGRAPHY

DK2R - dkai2ray.company *Creative direction, campaign, storefront*
A 12-country limited jersey line and the shop it sold from, built for the 2026 World Cup and closed out with the tournament. Football, identity, prestige.

Afro Week 2026 - millennium-hall.vercel.app *Event identity & booking UX*
Ticketing site for a theatrical production at Millennium Hall, APU: 732 seats in live availability, a seat picker, free admission down to a name and an email, and an instant QR e-ticket. Pan-African red-gold-green used as structure, not decoration.

Plastivore - plastivore-plum.vercel.app *Concept brand & art direction*
A shoe with a bio-engineered sole that eats microplastics, built for APU's AD WARS marketing simulation. Scroll-scrubbed cinematic product film, an exploded four-layer sole diagram, three named colorways, pitched in an investor-deck register. Fictional science, real design discipline.

Too Easy - too-easy-seven.vercel.app *Brand & product-first commerce*
A minimal streetwear label built as an exercise in restraint. Five pieces shot and priced like a real drop, carried by the product grid alone, with no manifesto and no lifestyle campaign.

First Light - first-light-alpha.vercel.app *Product design & editorial art direction*
A photo-culling tool made as a gift. Point it at 1,847 wedding frames, describe the edit in plain English, get a ranked shortlist with a line of reasoning on each pick. Sold with warm editorial photography rather than UI screenshots, and nothing full size leaves the machine.

Danflix - danflix-murex.vercel.app *Interface art direction*
A birthday gift built as a streaming service. Profile gate, wordmark ident with its own audio sting, ten titles with posters, hover previews, detail modals and a subtitled player, all set to Netflix's own design tokens.

CAPABILITIES

- Creative direction: brand identity, art direction, campaign systems, visual DNA and style-rule authoring, editorial and copy voice.
- Production: AI campaign photography and video (GPT Image 2, Higgsfield Cinema Studio, Kling, Seedance), colour grading, motion and edit (CapCut), music (Suno).
- Design engineering: Next.js, Tailwind, Supabase, Vercel, Stripe/PayPal - design systems taken from concept to a deployed, transacting site.

RECOGNITION & EDUCATION

Ritsumeikan Asia Pacific University (APU) **Beppu, Japan**
B.B.A., Finance *Expected 2029*

- 1st Place, APU Annual Hackathon 2025 · 1st Runner-Up and Best Speaker, Hult Prize APU Campus Round 2026 · 1st Place, Next Einstein Forum (Africa Science Week) 2023 · Best High School Short Story Writer 2023.
- Music: five original tracks released as RETRO on Spotify and Apple Music.
- Languages: English (native), Spanish (intermediate), Japanese (developing).
